I am joining the Society for Conservation Biology North America (SCBNA)—part of the global Society for Conservation Biology, which represents nearly 3,000 members across six global regions—in expressing strong opposition to the proposed rule to rescind the regulatory definition of “harm” under the Endangered Species Act (ESA). This proposal would significantly weaken one of our nation’s most effective conservation laws and put imperiled species at greater risk by removing a vital tool for addressing habitat-based threats. Protecting the habitat of threatened species is essential to preserving the unique natural heritage that defines and enriches our Nation.

Read why we MUST protect the definition of “Harm” under the Endangered Species Act: (**link**)

Bluesky

TAKE ACTION with SCBNA TODAY to write in opposition to the proposed rule to rescind the regulatory definition of “harm” under the Endangered Species Act.

This change would significantly weaken one of our nation’s most effective conservation laws and jeopardize the survival of imperiled species.
