I am joining the Society for Conservation Biology North America (SCBNA)—part of the global Society for Conservation Biology, which represents nearly 3,000 members across six global regions—in expressing strong opposition to the proposed amendments to the Marine Mammal Protection Act of 1972. If passed, this legislation would roll back the foundational safeguards that have protected marine mammal populations for over 50 years, undermine ocean health, reverse decades of conservation success, harm the coastal economies that depend on productive, resilient marine ecosystems.

Read WHY and HOW we MUST protect the MMPA here.
