I am joining the Society for Conservation Biology North America (SCBNA)—part of the global Society for Conservation Biology, which represents nearly 3,000 members across six global regions—in expressing strong opposition to the proposed changes to the Endangered Species Act (ESA) implementation guidelines. If enacted, the proposed revisions will deteriorate vital ecosystem functions that sustain biogeochemical processes, thus jeopardizing the core benefits that people get from nature, such as disease regulation, pollination, and recreation

Bluesky

TAKE ACTION with SCBNA TODAY to write in opposition to the proposed changes to the Endangered Species Act (ESA) implementation guidelines.

If enacted, they will deteriorate vital ecosystem functions that sustain biogeochemical processes and jeopardize the core benefits that people get from nature.
